## **Presenting the VISTA (Virtual Road) experimental facility for automotive research of TU Ilmenau**

Abstract - The Virtual Road experimental facility in Ilmenau has been built by the Technische Universität Ilmenau for advanced automotive research in the context of the Thuringian Innovation Centre on Mobility, established at Ilmenau. VISTA with its large (semi-)anechoic chamber with its integrated antenna measurement range for automobiles and its dynamometer for experiments with cars with running engines is a unique facility that is presented in this TD to the IRACON EWG IoT
